PROFESSIONAL EXPERIENCE

Oklahoma Turnpike Authority – Data Analyst (Remote)
2025 – Present

- Develop and optimize complex SQL queries across large operational databases to support quantitative billing analysis and workflow performance monitoring.
- Design structured intermediate datasets and temporary tables to enable scalable reporting while performing cross-system data validation and discrepancy analysis.
- Improve query efficiency and analytical performance on multi-million-row datasets, strengthening data reliability for financial and operational decision-making.

Devon Energy – Tax Technologist Intern
March 2025 – August 2025

- Designed automated ETL workflows using Python and AI agents to transform unstructured tax documents into structured datasets for analysis.
- Built and maintained Power BI dashboards for quarterly and annual reporting while supporting SQL Server job monitoring and data validation processes.
- Developed workflow automation scripts using PowerShell and Alteryx to improve data processing consistency and reduce manual intervention.

University of Oklahoma – Graduate Teaching Assistant
August 2025 – December 2025

- Supported instruction in Data Management for Business Intelligence, mentoring students in SQL-based data modeling, ETL design, and analytical problem-solving using Excel, Tableau, and Power BI.

DATA & ANALYTICS PROJECTS

NBA Team Performance Modeling – Python, R, Tableau

- Developed and validated a predictive scoring model using 8 years of historical NBA data, correctly identifying 10 of 16 playoff teams and the eventual champion.

Casino Patron Trend Analysis – Python, SQL, Power BI, Tableau

- Analyzed multi-year patron transaction data to identify behavioral and revenue trends; developed dashboards using DAX and SQL-calculated fields and presented insights to stakeholders.

EDUCATION

University of Oklahoma – Norman, OK
Master of Science in Management Information Technology (Data Science & Analytics Focus), GPA: 3.79
Bachelor of Business Administration in Management Information Systems, Minor: Economics

SKILLS

Python • R • Statistical Modeling • SQL (SSMS) • Data Validation • Query Optimization • Power BI • Tableau • DAX • ETL Development • Workflow Automation • Alteryx • PowerShell
